ABOUT CITYBAG

Compressive Strength:	25MPa (specified) at 28 days
Slump:	120mm +/- 30mm
Workability:	8–10 hours
Initial Setting Time:	13 hours
Final Setting Time:	19.5 hours
Walkability:	24 hours

Say goodbye to the hassle of mixing your own concrete.

No worries about where to store your dry concrete bags.

SAFETY PRECAUTIONS

Concrete is highly alkaline, and therefore caustic.

- > Avoid skin contact.
- > Wear: protective clothing, safety glasses, gloves, kneepads and waterproof boots.
- > In case of skin contact, rinse with plenty of water.
- > In cases of contact with eyes; rinse for several minutes and seek medical attention.

CONVENIENT

Our ready-mix concrete is ready to place, delivered to you in a big bag.

FAST

Save time on concrete preparation and worksite clean-up.

CLEAN

There's no dust from breaking bags or mixer spillage.

PROFESSIONAL RESULTS

Professionally mixed concrete leads to professional results.

USE CityBAG CONCRETE FOR:

FENCE POSTS & TRENCHES

PATIOS

NO MORE DRY MIX BAGS OR MIXER RENTALS

- > CityBAG by Lafarge is ready-mix concrete, ready when you are.
- > CityBAG saves time and money for small contractors and DIYers.
- > CityBAG concrete is delivered wet in 500L (1200Kg) bags. This means there are no dry-mix bags to store, no mixer to rent, and no mixing to mess up.
- > Your concrete is right every time and you can spend time placing concrete rather than behind a mixer.

DELIVERY & USE

- > Confirm worksite accessibility for delivery trucks.
- > Designate a secure area for the delivery truck.
- > No CityBAG returns can be processed by our facilities, except with prior approval by Lafarge.
- > CityBAG concrete is useable immediately.
- > CityBAG concrete cannot be pumped. The bags cannot be reused. Used bags (empty or full) must be disposed of in public or private landfills.
