

VALUE ADDED CONCRETE SOLUTIONS

Lafarge is a global leader in the development and application of innovative concrete products. Our proprietary concrete solutions are designed to address specific project challenges in addition to providing performance advantages such as reduced labor and accelerated construction.

As your on site ready mix producer, Lafarge offers our global network's technical knowledge and experience in cement and aggregates, to optimize concrete mix design for your specific needs.

Lafarge's proprietary concrete solutions have been extensively used, across Canada, to successfully build durable structures while meeting project timelines.

Agilia is a self-consolidating concrete that is easily placed without the need for vibration, significantly reducing construction time and cost.

Chronolia uses advanced technology that accelerates high early strength gain without affecting normal placement procedures. This provides improved turnaround time and productivity.

The Ultra Series range of products is designed to provide flexible alternatives and sustainable solutions to meet concrete needs. This range of high performance concrete provides improved productivity.
